

# MD RUBYAT ISLAM

AI-Augmented Laravel Engineer

Bangladesh (Remote) | rubyat.ais@gmail.com | +880 1722 891000

Portfolio: rubyat.info | LinkedIn: linkedin.com/in/rubyat | GitHub: github.com/rubyat

---

## PROFESSIONAL SUMMARY

---

Senior Laravel/PHP developer with 10+ years building production web applications, SaaS platforms, management systems, and API-driven workflows. I run a real AI-augmented development workflow — agentic coding tools (Claude Code, Cursor, GitHub Copilot) in daily use — acting as the architect and reviewer while AI handles implementation heavy lifting. I rely on deep Laravel knowledge, SOLID principles, Pest testing, and practical business-logic experience to ship reliable features. I value outcomes over output: the feature landing in the user's hands, not the purity of the process.

## TECHNICAL SKILLS

---

**AI-Augmented Engineering:** Agentic coding workflow (Claude Code, Cursor, GitHub Copilot) in daily use; prompt engineering; AI-assisted refactoring and code review; shipped AI/LLM API integration project

**Backend:** PHP, Laravel, CodeIgniter, RESTful APIs, MVC, Eloquent, Service Providers, Facades, authentication/authorization, payment & third-party integrations

**Architecture & Quality:** SOLID, DRY, SRP, Clean Code, code review, refactoring, Pest (PHP testing)

**Frontend:** Vue.js, JavaScript, Tailwind CSS, Bootstrap, HTML, CSS

**Database:** MySQL, PostgreSQL, relational design, query optimization, Laravel caching

**SaaS & Domains:** SaaS platforms, multi-tenant/reseller systems, e-commerce, invoice/quotation/order workflows, booking systems, CMS

**Tools & Ops:** Git, GitHub, GitLab, CI/CD (GitHub Actions, GitLab CI), Linux VPS, cPanel/CyberPanel

**Working knowledge (building):** RAG and vector search concepts (pgvector, Pinecone), AI chat/document workflow architecture

## PROFESSIONAL EXPERIENCE

---

### WebLaunch.nl — Web & Apps Developer

May 2016 – Present

- Led and delivered 50+ web and application projects across new builds, feature upgrades, and production bug fixes for international clients.
- Built customized SaaS-style, e-commerce, CMS, and business-management systems using Laravel/PHP, CodeIgniter, Vue.js, and MySQL.
- Use an AI-augmented workflow (Claude Code, Cursor, GitHub Copilot) to generate, refactor, and debug code, applying architecture judgment and code review to keep output reliable.
- Integrated third-party, payment, and order APIs to streamline business workflows.
- Maintained and improved existing production codebases through refactoring, performance work, and SOLID-aligned design.

### Print Point SE — Senior Web Developer (Part-time)

May 2020 – Present

- Led a 2-developer team delivering web-based printing, restaurant, and multi-restaurant operational systems.
- Managed delivery end to end — requirements, planning, development, QA, and production support.
- Built order and printing workflows that improved client operations and reduced manual errors.

### Upwork — Freelance Web Developer

May 2016 – August 2017

- Completed 14 projects with 5-star ratings and achieved Top-Rated status, delivering PHP/e-commerce solutions on tight deadlines.

### SristiWeb.com — Senior Web Developer

December 2013 – April 2016

- Promoted to Senior Web Developer within one year; played a main role in building Job Management, Content Writing Management, and Tender Management systems with role-based workflows.

## SELECTED PROJECTS

---

### **AugmentInvoice — Laravel Business Document Platform**

*Laravel, MySQL, Tailwind CSS, Vue.js*

- Built quotation, proforma invoice, invoice, packing list, and purchase-order workflows with customer/product management.
- Implemented quotation approval flow, Excel import/export, and configurable PDF export — the kind of finance/admin automation a school operating system depends on.

### **WorkSecure — Laravel Quotation, Invoice & Booking System**

*Laravel, MySQL, Bootstrap, Vue.js*

- Took ownership of an existing invoice platform and added quotation, invoice, and unit-based rental booking features.
- Built availability/booking logic and Google Maps visibility for rented units by location.

### **FinditTrading & Compleetshop.cloud — B2B E-commerce / Reseller SaaS**

*OpenCart, CodeIgniter, MySQL, Vue.js*

- Built a parent-child multi-shop SaaS where reseller sites are created dynamically and stay synchronized with a ~14k-product parent catalog.
- Implemented product synchronization and order forwarding back to the parent system across retail and wholesale flows.

## EDUCATION

---

- MBA, Accounting & Information Systems — Jagannath University, Dhaka (2015)
- BBA, Accounting & Information Systems — Jagannath University, Dhaka (2014)

## CERTIFICATIONS / TRAINING

---

- Web Design & Development — Daffodil Institute of IT
- Google UX Design Certificate series (available on request)

## LANGUAGES

---

Bangla (native); English (B2 — strong written, comfortable on calls)
